Experience

Frontend developer, intern, Foothill Technology Solutions, Spring 2022

- my interest in web development and dedicated learning in it got me an internship in my first year of college.
- I learned how to work and communicate with my colleagues and I learned how to test code using JEST.
- I learnt modern frontend development tools like Typescript, React, Storybook and Redux Toolkit and used them in building a POS system to manage products and carts for supermarkets.
- I also tracked my project's progress using Git and GitHub and I tested my code using jest.

Education

Bachelor in Computer Science, An-Najah National University, 2022-2026.

Projects

- Quiz app, a 5-questions quiz built with react, it provides you with 5 random questions. For each question you answer correctly, you earn a score of 1 – [check it on GitHub](#).
- POS system, A point-of-sale system designed to efficiently manage carts and products for businesses and markets. – [check it on GitHub](#).
